

Part-Whole & Equivalent Fractions Stop Motion

WHAT: Stop Motion Studio is a stop motion app that allows you to join together many pictures into a movie. The onion skin feature helps you line up your shots to create a smooth animation. The voice recording feature even lets you narrate the story once you're done filming.

YOUR CHALLENGE: Using Lego bricks and custom props, create a stop motion video that visualizes a part-whole relationship. Demonstrate how parts of the whole can be equivalent fractions. (3.NF 2a,b and 3 a,b)

CAN YOU:

- Create an engaging storyline?
- Add a voice narration to explain your thinking?
